

**Measuring Atmospheric Pressure**      Name .....

A barometer is used to measure the pressure of the air around us (the atmosphere).

1. Who invented the barometer?
2. In which year was it invented?
3. What poisonous liquid is found in some barometers?
4. Find out what the air pressure is in London now. Write it down along with the date and time. If you don't have a barometer in your house (not many people do) try looking at a weather report.  
Date: .....  
Time: .....  
Pressure: .....
5. Find as many different units for pressure as you can – minimum three:
